Education

• **Department of Mechanical Engineering - Technological Educational Institute of Chalkis**   2012

thesis: Design and simulation of centrifugal pumps

- Design of centrifugal pump using Solidworks cad software
- Mesh creation using Ansys cfx fea software
- Computation of pump characteristic curve

Experience

Dropshie Arbitrage Solutions - Front-end Developer   2018-2020 (part-time)

- Core Member of dropshie team and responsible for front-end design and functionality
- Frameworks and libraries used include ReactJs, redux, redux saga, material-ui, d3
- Development of chrome extensions that automate user tasks considering the app usage
- Linux server maintenance and support

Irepair.gr - Head Technician - Erp Developer   2012-2020

- Hardware repairs, specialization in apple tablets
- Development of erp add-ons, Webscraping, product listing, Crm integration
- Frameworks and libraries used include PyQt, selenium, beatiful soup, Puppeteer, sqlite

Willo Hellas - Internship   2011-2012

- Design of mechanical prototypes using cad softwares
- Computation of fluid dymanics using fea softwares
- Technologies used include Dassault Solidworks, Ansys (Fluent, cfx), realflow

Metropolis Music Store - SalesMan   2001-2004

Skills

Programming Languages: Javascript, Python, Scss, Bash Scripting
Operating Systems: Linux (Arch, debian), Windows
Version control: Git
Editors: Visual Studio Code, Sublime Text

Personal Information

- Fulfilled military obligations
- Driving licence

Hobbies:
- Mountain Biking
- 3d design with Autodesk maya and SideFx Houdini
- Gaming
- Guitar
